

DANTE SCHOOL

6090 Lachenaie
Montreal, QC H1S 1P1

January 25, 2012

Dear Parents,

Dante is proud to announce its new *Environmental Project: Elimination of Water Bottles*. The children have been explained the importance of eliminating water bottles rather than recycling them. Too many bottles that should be recycled are not and this is due to the fact that there are too many; therefore, they are thrown away in landfills. We, at Dante School, want to make our contribution to help alleviate this problem and hoping that many other people will follow our initiative.

Your child (ren) has received a water bottle with the Dante Logo on it. They are encouraged to use those bottles to carry their drinks to school (either water or juice). Please do not give them larger bottles as they are heavier to carry. The children will be allowed to refill their bottles. Everyone will have similar water bottles; therefore, we encourage you to label and add a tag on the bottle so it can be easily identified by the child.

The purchase of these bottles has been made possible with the many environmental contests our Green Committee has taken part in. Last year, we received \$9,000.00 with our composting and Waste Free Lunch projects. Many thanks to the Dante staff, Green Committee, parents, and our students for taking part in our endeavors.

Thank you for your continuous support in encouraging your child to help our environment.

Yours truly,

Ida Pisano
Principal
